FDD Abstract of [REDACTED]

THE ILSENBURG ROLLING MILL (4 pp; German; [REDACTED])

25X1X

25X1A

This report consists of minutes of a conference which took place on [REDACTED] in the conference room of the AT [sic], the topic of which was the Ilsenburg Rolling Mill.

The subjects discussed included an order for a new power converter for the heavy plate mill at the Ilsenburg mill, a high-voltage power line, and other technical equipment needed for the mill. Discussions centered around details of these installations, on who was to have the responsibilities for carrying out the work, who was to supply the installations and equipment needed, advantages and disadvantages of one type of rolling mill motor over another, and similar subjects.

Included in the report is a list of all participants, including representative of the Ministry of Industry, the Federation of People-Owned Iron and Steel Plants (Vesta), the Federation of People-Owned Enterprises for Electric Machine-Building (VEM), the Sachsenwerk Plant, the Ilsenburg Rolling Mill and the AT. 25X1A
